

SCOR

DIGITAL STANDARD

ASSESS AND IMPROVE YOUR SUPPLY CHAIN WITH THE INDUSTRY-LEADING SCOR DIGITAL STANDARD

The Supply Chain Operations Reference Digital Standard (SCOR DS) is the only comprehensive, universally accepted and publicly available supply chain standard helping organizations across industries make dramatic and rapid improvements in their supply chain processes.

Implementing SCOR drives results and improves operations.

Typical results include:

- Operating income improvement
- Two-to-six times return on investment in the first year
- Improvement in return on assets for fixed-asset technology investments
- 30% faster digital transformation project implementations
- Reduction in information technology operating expenses through improved use of standard system functions
- Ongoing profit improvement of 0.5%-1% per year

Don't just take our word for it:

NEW IN 2022:

SCOR DS has recently undergone a comprehensive update; modernizing the framework to include sustainability and the digital body of knowledge. This version shifts thinking from a linear supply chain model to a more synchronous network, leading directly to improved business performance.
